

FRANKLINS COLLECTION

Sponsored by MLN Token

1. THE FRANKLINS PROJECT

Franklins is an NFT project founded on equality, freedom of expression and our rights to be different. The core beliefs are that all human beings are equal and possess the right to be different and express themselves without anyone standing in the way.

The Franklins project is a collection of NFTs, a big family that loves each other and respects their differences the way we humans should love and respect another.

Joining the Franklins family means becoming a bona fide member of a whole new clan where you are one with all other members for better or for worse. You will always stick together so that no one is ever left alone.

Franklins NFT collection is a collection of stickers, each representing a member of the Franklin family. Below is a sticker of Franklin.

The Franklins NFT project is a beneficiary of The Moon Light Night (MLN) project's sponsorship. MLN is a revolutionary launchpad that helps talented artists get the recognition they deserve and connect them with the opportunities they need to advance their careers.

The MLN project is built on the XRP ledger, an open-source, public blockchain that facilitates swift global payments. It is a cost and efficient network that can handle thousands of transactions simultaneously without downtime.

2. MINTING ON THE XRP LEDGER

In September 2021, Ripple, the company behind the XRP ledger, announced a \$250 million fund that will provide targeted support for creators, brands, and marketplaces to explore new use cases for NFTs on the XRP Ledger leveraging its inherent advantages of speed, cost and sustainability.

The fund is in line with Ripple's commitment to supporting NFTs on its XRP ledger and will facilitate the evolution of NFT utility and foster mainstream adoption. Ripple will also launch its XRP marketplace, where users can trade their NFTs at lightning speeds and low cost.

The Franklins project is creating a collection of two hundred Franklins NFTs. However, we will issue two hundred tokens because there is currently no marketplace for selling XRP NFTs.

These two hundred Franklin tokens can be traded and exchanged but will not be Franklin NFTs. When XRP launches its marketplace, we will create our Franklin NFTs. Holders of the Franklin tokens will be able to exchange their tokens to XRP and claim NFTs based on the actual selling price of the NFT collection.

3. ROADMAP

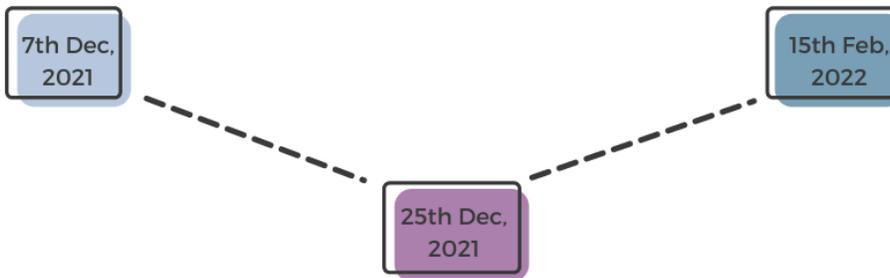

Roadmap and Future

We will conduct our Franklin airdrop event.

Here we will airdrop tokens to fifteen thousand trust lines under the condition that they must have at least five Moon Light Night tokens in their balance.

We will also launch the Franklin NFT project's official website on the date of our airdrop event so that every member of the community can enjoy unfiltered access to all parts of the project as we build them.

Complete the creation of five hundred Franklins, convert them into NFTs and sell them to members of the Franklins family.

Complete the creation of two hundred Franklin tokens while we await the official launch of the XRP marketplace, where members of the clan will be able to buy and sell their NFTs.

4. TOKENOMICS

As mentioned in the previous sections, two hundred Franklin tokens will be minted before the launch of the Franklin NFT project. The two hundred tokens will be distributed using the following token allocation formula.

Thirty per cent of the Franklin tokens will be airdropped to early adopters of the Franklins NFT projects. Users must hold at least five Moon Light Night tokens to qualify for this airdrop.

Thirty per cent of the two hundred Franklin tokens will be reserved for the artist(s) behind the project. This allocation is in line with the mandate of

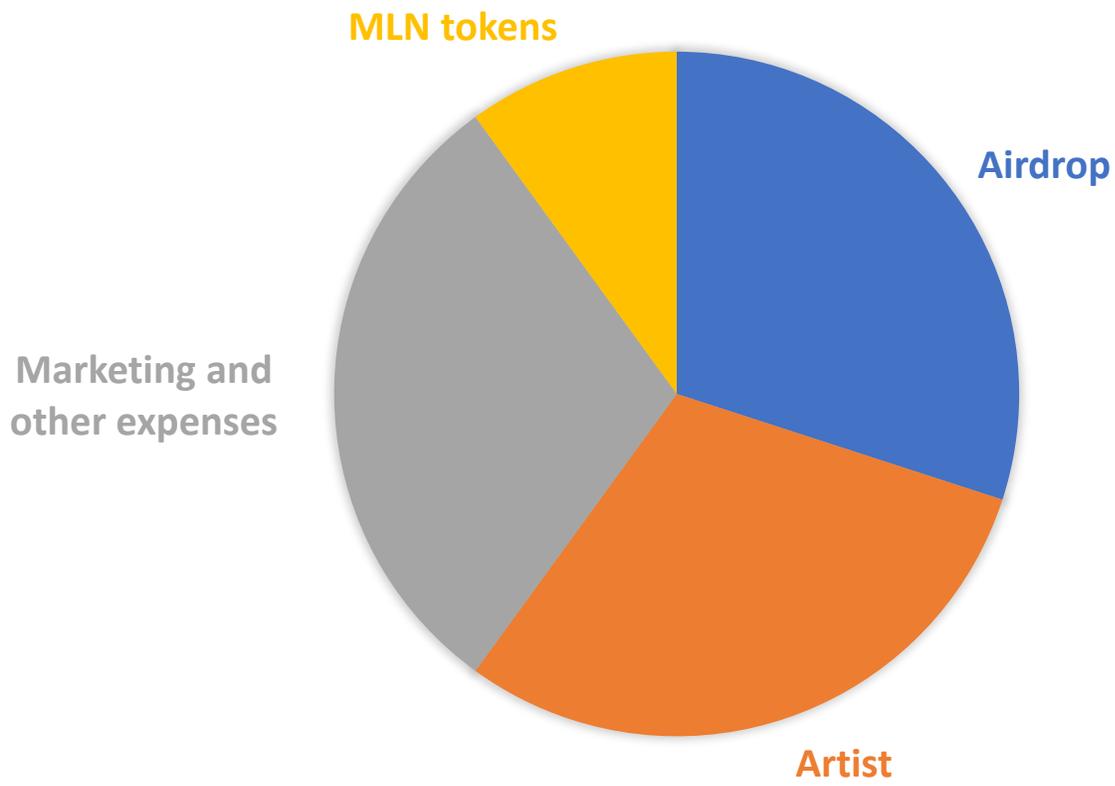

the Moon Light Night platform to create recognition and wealth for talented artists.

Another thirty per cent of the Franklin tokens will be allocated to offset marketing costs and all other expenses involved in the successful launch and continuous smooth running of the Franklins NFT project.

The final ten per cent will be reserved in the form of MLN tokens. This provision is because Moon Light Night is a sponsor and facilitator of the Franklins NFT project.

TOKEN ALLOCATION

5. THE ARTIST

Below is a letter from the artist/creative brainbox behind the Franklins project:

'I dove into art as a kid living in the province of Oriente in Cuba. I lived with feelings of contradiction and vigilance, knowing that any expression that spoke out against the regime could ruin the little freedom I was allowed to have.

Sometimes imagination is a strange place. A border between two worlds. One to which you can escape from, and one to which you can escape to. As an artist living in Cuba, however, my escapes held an element of risk. An element that I hope somehow comes through the Franklins Collection, without being obvious...as just a little kid exploring.

The idea of the Franklins NFT project was conceived during a conversation with my 11-year-old daughter. We were talking about how all humans are equal, but at the same time, we have the right to be different, we all have the right to express how we feel, and nobody can stop us from doing it.'

Raiko is a Cuban born island boy who now lives in South Florida. When he's not creating Franklins, you can find him on social media sparking controversial conversations on freedom, human rights, censorship, and the support of independent artists.

6. FAQ

Q: How many tokens make an NFT?

A: One Franklins token equals one Franklins NFT.

Q: How many Franklins tokens will be airdropped?

A: We plan to airdrop 60 tokens (30% of 200). That way the anyone can be a part of the clan and own their share of the market.

Q: Can users trade their Franklins tokens?

A: Users own full rights to their tokens and can trade them based on the forecast of our NFT price at launch. However, MLN is not liable for any resulting profit or loss from trading tokens.

Q: What happens after NFT sales?

A: After sales of the NFT collection, we will exchange franklin token for XRP depending on the selling price; for example, 200K XRP. We will exchange one franklin for one thousand XRP. So, if someone received 0.05, they can exchange it for 50 XRP.
